

A night in the Emergency Room

Workshop POCUS Friday 22 March 2024

Speakers: Soren Boysen, DVM, DACVECC, Kris Gommeren, DVM, DECVIM, DECVECC

Location: Clinica Veterinară EchoVet, Adresă: Str. Bartók Béla, Nr. 11, Cart. Grigorescu, Cluj-Napoca, Jud. Cluj

Duration: 6 hours

Participants: 15

Important: This workshop will be in english without simultaneous translation

09:00 - 12:00	Point of care ultrasound – let’s learn
12:00 - 13:00	Lunch
13:00 - 16:00	Point of care ultrasound – let’s practice

Veterinary Point-of-care Ultrasound for Everyday Practice

This workshop, developed and delivered by leaders in the field of veterinary point-of-care ultrasound (POCUS), will build on the interactive lectures which are a prerequisite to the lab. Through practical, hands-on training, participants will have the opportunity to learn and practice all of the common veterinary POCUS techniques currently used to assess the abdomen, pleural space, lung, and heart. Phantoms training models will also be used to demonstrate and practice ultrasound-guided vascular access. This lab will focus on techniques developed by the instructors, designed to increase veterinary POCUS diagnostic accuracy, and help facilitate easier application into everyday veterinary practice. These are all techniques that can be performed by any practitioner and should be used in everyday practice! We will also briefly review basic ultrasound machine function and probe manipulations.

Learning Objectives:

- Perform point-of-care ultrasound scanning of the abdomen, pleural space, lung, heart, and vascular systems
- Use ultrasound to guide IV catheters into phantom vessels using both in and out of plane techniques
- Identify all key anatomic structures that are assessed during all veterinary POCUS exams.

A night in the Emergency Room

Workshop Emergency Surgery Friday 22 March 2024

Speaker: Rachel Hattersley, CertSAS, DECVS, MRCVS

Location: Cabinet Veterinar Happy Pets, Str. Corneliu Coposu, Nr. 48, Cluj-Napoca, 400394, Jud. Cluj

Duration 6 ore

Participants : 10

Important: This presentation will be held in english without simultaneous translation

09:00 - 12:00	Let's learn
12:00 - 13:00	Lunch
13:00 - 16:00	Let's practice

Emergency surgery can be very rewarding but also very stressful. The clinician can be confronted with non-familiar procedures that need to be performed under pressure.

This wet lab is an opportunity to perform for the first time or perfect techniques when it comes to some of the emergency surgical procedures clinicians can be confronted with.

Rachel Hattersley will explain how and when to place a tracheostomy tube, how to deal with intestinal obstruction by performing an enterotomy or the dreaded enterectomy. We cannot ignore the urinary bladder emergencies; clinicians will have the occasion to perform a cystotomy and learn how and when to place cystotomy tubes.

Rachel is an amazing surgeon and teacher so don't be afraid to ask for tips and tricks, she has a vast experience to share from.

A night in the Emergency Room

Dry lab - Diagnostic cytology in emergency Friday 22 March 2024

Speaker: Catherine Wagg, DVM, DACVP

Location: Cluj Arena, Adresă: Aleea Stadionului, Nr. 2, Cluj-Napoca, 400375, Jud. Cluj

Duration: 3 ore

Participants: 20

Important: This presentation will be held in english without simultaneous translation

15:00 - 16:30	Case discussion
16:30 - 17:00	Coffee break
17:00 - 18:00	Case discussion

"Unleashing the power of clinical pathology in emergency and critical care cases" – Enter the realm of clinical pathology and uncover the utility of microscopic imagery alongside analyzer results in the diagnosis and interpretation of emergency cytology and hematology cases!

In this session we will work through a variety of digital images as a group in an informal case-based format. We will cover key aspects of sample preparation, approach to microscopic image evaluation and diagnostic interpretation.

See you there!
